

Evidence-Informed and Designed for Real Care Environments. Individual Support Solutions Across Settings *One community. Every age. Every ability.*

Sometimes the best support is the kind you can receive right at home. Waverly Cognitive's In-Home Program brings compassionate, skilled cognitive engagement directly to you or your loved one — providing meaningful connection, personalized activities, and supportive structure without the stress of leaving home.

The Waverly Cognitive Model

We believe care should not be fragmented by age, diagnosis, or service category. Our services are built on:

- Evidence-based practice
- Integrated methodology (ABA-informed + Montessori + person-centered care)
- Dignity, inclusion, and belonging

Additional Dementia & Enrichment Services Optional Support

Families often choose to pair in-home services with additional enrichment and consultation support.

Dementia Services include:

- Memory screenings
- Cognitive stimulation programs
- ADL reinforcement and functional skill-building
- Enrichment classes for cognitive maintenance
- Social and emotional engagement

Programs are structured to promote routine, emotional safety, and preserved independence, while honoring each person's identity, history, and lived experience.

In-Home Program *Our Signature Support*

Our in-home facilitators are trained through our trademarked Cognitive Comfort™ Facilitator Training and arrive with Cognitive Comfort™ Kits — bringing purposeful, engaging activities to every session.

In addition to private homes, we may also provide services for your loved one in an Assisted Living, Skilled Nursing, or Rehabilitation environment.

All teams are:

- PCA-trained
- Fully background checked
- Selected for professionalism, reliability, and above all, empathy.

In-Home Sessions Help To:

- Reinforce cognitive and functional skills
- Reduce challenging behaviors through meaningful activity
- Strengthen belonging, connection, and purpose
- Support family caregivers with reliable relief, guidance, and confidence

Flexible & Affordable Scheduling

We offer affordable hourly, weekly, and monthly rates to meet the needs of your household and your care plan.

Enrichment & Consultation Services

Art Enrichment

Our Montessori inspired approach supports fine motor skills, sensory regulation, emotional expression, focus, and confidence.

Clay Therapy is a non-clinical core component, with an on-site kiln supporting the full creative process from start to finish.

Music Enrichment

Supports memory recall, communication, emotional grounding, focus, and connection across dementia and neurodivergent diagnoses.

ABA-Informed Consultation

Ethical, person-centered consultation supporting:

- Skill development and independence
- Behavior support planning
- Emotional regulation and functional communication
- Family and caregiver support
